RE: CORA Request received via mail on Oct. 31, 2018

Dear Ms. McNeil:

The records attached to this email are being sent in response to the Colorado Open Records Act request you sent via mail, which we received on Oct. 31, 2018. The contents of this letter and attachments are responsive, specifically, to your requests for:

- The most recent radon inspection records for all schools in District 51.

The attachment lists which years schools were tested and the test results. The attachment shows when and how many areas tested above 4 picocuries per liter. If no areas tested above 4 picocuries per liter, no follow-up tests were required.

Tests are performed in multiple areas – sometimes dozens of places – within a school. If some spots did test above 4 pCi/l, follow-up tests were performed. These results are also included. The far right column shows what mitigation steps were taken if additional sampling was required after follow-up tests.

I believe the attachment is responsive to your request and will give you the information you seek. However, I also have a two-inch-high stack of hard copies of radon measurement reports for the schools if you would like to come take a look at them. At least an hour of staff time has already been spent assembling information for this CORA request, so we could scan the documents and deliver them to you electronically if that is your preference, however, there would be a fee charged for this additional work. School Board Policy permits a charge of \$30 for each additional hour of staff work after the first hour of work performed to fulfill a CORA request.

If you have any questions regarding this letter, please contact me directly at 254-7912 or Emily.shockley@d51schools.org.

Sincerely,

Emily Shockley, Public Information Officer
Mesa County Valley School District 51
